PRESS RELEASE

For Immediate Release

CAD+T at Saudi Wood Expo 2024

Stand 2F84

From the 2nd-4th September 2024, international CAD/CAM and ERP software specialist, CAD+T will be exhibiting at the Saudi Wood Expo, Saudi Arabia's largest wood industry business event in Riyadh.

Featuring a fully interactive stand, visits will be able to explore the company's complete module-based software offering. Taking an adaptable approach to software design, CAD+T's highly customisable software solutions are designed in a way that is completely unique to your businesses' production needs and as such, can work around your most challenging requirements. So, whether you're a small manufacturer looking for a step-by-step implementation process or a growing company looking for a full end-to-end solution, CAD+T can help you implement a simple, single-source solution that can optimise your production.

But, we know that seeing is believing. That's why visitors are invited to take part in a wealth of software demonstrations designed to highlight how they can streamline production and increase efficiencies. Experience the very latest cloud-based configurator tools, newly launched web-solutions and complete EOS product family first hand. Plus, be one of the first in Saudi Arabia to see the new RFID automated parts tracking system - which allows manufacturers to track parts and real-time workflow with no manual intervention.

Further additions to CAD+T's digital network will also be on display, with software experts on hand to talk to perspective clients about the company's latest developments and bespoke software solutions.

Visit CAD+T at Saudi Wood Expo in Riyadh from the 2nd-4th September 2024, stand 2F84. For more information please visit www.cadt-solutions.com or get in touch with the local sales representative Mr. Tony Yazbeck at tony.yazbeck@cadt-solutions.com or +971 50 102 6117 and book you demo on site.
